ENVIRONMENTAL PLANNING SERVICES

“Experienced, Professional, Customer Oriented”

The U.S. Army Corps of Engineers is nationally recognized for its planning capability, process, and expertise in addressing water resource problems and opportunities. The Corps uses a six step planning process which includes: 1) identification of problems and opportunities; 2) inventorying and forecasting of resources; 3) formulating alternative plans; 4) evaluating plan effects; 5) comparing effects of alternative plans; and 6) selecting the best plan.

Environmental planning services available to Federal, state, and local agencies, as well as tribal governments:

Dennis Cannon
Chief of Planning
Walla Walla District

- ✱ Development of non-traditional Civil Works studies involving potential flood control, navigation, environmental restoration, and development of multi-purpose water resources projects
- ✱ Planning and execution of public involvement activities
- ✱ Leading multi-disciplinary teams through problem solving and/or the planning process
- ✱ Conducting literature searches, field investigations, and model development in preparation of evaluations and analyses to determine environmental and economic benefits and impacts
- ✱ Analyze risk and uncertainty
- ✱ Prepare cost recovery analyses
- ✱ Conduct financial analyses
- ✱ Conduct market analyses
- ✱ Preparation and coordination of environmental documents ensuring compliance with the appropriate Federal, state, and local laws, executive orders, regulations and requirements.
- ✱ Mitigation planning
- ✱ Development of management plans and master plans
- ✱ Integration and application of GIS technologies
